**MHP earns top ratings in ISG's SAP ranking**

## According to ISG, MHP is one of the leading SAP transformation partners in Germany

- In the latest ISG report, "SAP Ecosystem 2026", the management and IT consultancy MHP received top ratings in three categories
- MHP achieved "Leader" status in both the SAP S/4HANA System Transformation and SAP S/4HANA System Transformation Mid-Market categories, as well as "Product Challenger" status in the SAP Business AI & BTP Services category
- MHP also ranks among the top performers in customer reviews

**Ludwigsburg** – According to the latest "Provider Lens™ Report: SAP Ecosystem 2026" from market research and consulting firm ISG, the management and IT consultancy MHP ranks among the leading SAP service providers in Germany. In both the SAP S/4HANA System Transformation and SAP S/4HANA System Transformation Mid-Market categories, MHP is positioned in the Leader quadrant, placing it among the top performers in one of the industry's most important transformation areas.

The assessment reflects the growing demand for comprehensive transformation programs in which companies not only modernize their ERP systems but also realign their processes, data architectures, and business models. In particular, the migration to SAP S/4HANA is currently considered one of the most significant technology transformations facing companies in Germany.

In addition to its strong position in digital transformation, MHP is classified as a "Product Challenger" in the area of SAP Business AI and Business Technology Platform (BTP) services. This positions the management and IT consultancy strategically in a rapidly growing segment that is playing an increasingly important role in the integration of artificial intelligence, data platforms, and scalable cloud architectures.

Oliver Nickels, Lead Analyst at ISG, comments: "MHP delivers S/4HANA transformation through a pragmatic, industry-grounded approach that balances speed, risk, and value while leveraging deep SAP expertise at scale."

## **Customer feedback highlights strong performance**

MHP also ranks among the top performers in customer reviews: With a CX score of 94.28 points, the company is one of the top three providers in the German market, well above the industry average.

“Companies are currently facing the challenge of implementing large-scale transformation programs under tight time and budget constraints. What matters most is not simply integrating AI but consistently leveraging its potential – particularly to accelerate transformation and scale best practices,” says Markus Wambach, Group COO at MHP. “This is precisely where we support our clients – from strategic planning to operational implementation – delivering measurable results.”

## **Transformation is becoming a competitive advantage**

The report’s findings underscore the growing importance of integrated transformation approaches in the SAP ecosystem. While traditional implementation projects are becoming increasingly standardized, competition is shifting toward holistic transformation programs that integrate technology, processes, and data models. With its position in the Leader quadrant and high levels of customer satisfaction, MHP reinforces its role as a trusted partner for complex transformation initiatives in industry, particularly in the automotive and manufacturing sectors.

## **About ISG and the Provider Lens™ Report**

The Information Services Group (ISG) is a global technology research and advisory firm. Its annual Provider Lens™ reports analyze the performance of IT and service providers worldwide. To do so, ISG draws on market data, customer feedback, and analyst evaluations. The company operates in more than 20 countries.

The study “ISG Provider Lens™ 2026: SAP Ecosystem” evaluates relevant software vendors and service providers across the APAC, Brazil, Germany, and U.S. markets, as well as globally, using a multi-stage research and assessment process. Based on ISG’s research methodology, the providers are positioned according to their respective strengths and capabilities. The research and analysis presented in this study draw on data from the ISG Provider Lens™ program, ongoing ISG research initiatives, interviews with ISG advisors, discussions with service providers, and publicly available market information from a variety of sources.

## **About the management and IT consultancy MHP**

MHP is a German management and IT consultancy headquartered in Ludwigsburg. For three decades, the company has been driving the transformation of processes and products for around 300 clients worldwide. As a trusted partner in the automotive, manufacturing, aerospace, public, and defense sectors, MHP supports its clients in strategy and IT transformations across the entire value chain. A subsidiary of Porsche AG, the company provides both strategic and operational consulting in key areas such as factory planning, supply chain management, integration and scaling, cybersecurity, artificial intelligence, program management, and platforms & ecosystems. The goal is to sustainably enhance speed, sovereignty, and resilience. With around 4,500 employees worldwide, MHP is united by a shared commitment to excellence and long-term success. This ambition continues to drive the company – today and in the future.
