Microsoft AI & Cloud Partner Program

MHP Achieves SAP on Microsoft Azure Specialization

- The management and IT consultancy MHP has achieved the Microsoft SAP on Azure specialization as part of the Microsoft AI & Cloud Partner Program
- The recognition confirms the proven expertise of MHP in the transformation, migration, and operation of business-critical SAP environments on Microsoft Azure
- MHP now holds three specializations in the Azure area: Analytics on Microsoft Azure, AI Platforms on Microsoft Azure, and SAP on Microsoft Azure

Ludwigsburg – As part of the Microsoft AI & Cloud Partner Program, the management and IT consultancy MHP has achieved the Microsoft “SAP on Azure” specialization. With this recognition, Microsoft confirms the extensive expertise of MHP in the transformation, migration, and operation of SAP environments on Microsoft Azure.

Microsoft awards specializations to partners that can demonstrate technical competence, successful customer projects, and qualified employees. They serve as an independent validation of high implementation and operational standards. For customers, they provide additional assurance that their SAP transformation will be carried out with a demonstrably qualified and experienced partner. At the same time, they strengthen the position of MHP as a Microsoft-validated expert for SAP on Azure. With this new specialization, MHP continues to expand its expertise in the Azure ecosystem. In addition to “SAP on Azure,” the company now holds three Azure specializations: “Analytics on Microsoft Azure,” “AI Platforms on Microsoft Azure,” and “SAP on Microsoft Azure.”

Thomas Frahler, Senior Sales Director & Partner Manager Microsoft at MHP, explains: “Microsoft’s SAP on Azure specialization is an important milestone for us and, at the same time, a strong signal to our customers: MHP has proven experience, quality, and scalability to securely and sustainably transform business-critical SAP environments on Microsoft Azure. In doing so, we create the foundation for greater agility, efficiency, and innovation – including new AI-powered scenarios in the SAP environment.”

The particular added value of MHP lies in combining deep SAP process and industry expertise – especially in the automotive and manufacturing sectors – with comprehensive Microsoft Azure know-how. As a result, MHP supports customers not only with technical migration,

but holistically from strategy through architecture and implementation to operations, governance, innovation, and AI-driven value creation scenarios. The new specialization also opens up expanded opportunities for joint customer projects, co-selling initiatives, and innovations around SAP and AI on Azure.

About the management and IT consultancy MHP

MHP is a German management and IT consultancy headquartered in Ludwigsburg. For three decades, the company has been driving the transformation of processes and products for around 300 clients worldwide. As a trusted partner in the automotive, manufacturing, aerospace, public, and defense sectors, MHP supports its clients in strategy and IT transformations across the entire value chain. A subsidiary of Porsche AG, the company provides both strategic and operational consulting in key areas such as factory planning, supply chain management, integration and scaling, cybersecurity, artificial intelligence, program management, and platforms & ecosystems. The goal is to sustainably enhance speed, sovereignty, and resilience. With around 4,500 employees worldwide, MHP is united by a shared commitment to excellence and long-term success. This ambition continues to drive the company – today and in the future.
